Usha Rani

Guntūr, Andhra Pradesh, India

rusharani2k6@gmail.com

I am a passionate and dedicated Computer Science Engineering student with a specialization in Arti cial Intelligence and Machine Learning. Currently pursuing my 2nd year, I am eager to apply my knowledge and enthusiasm to real-world projects. I have a strong foundation in programming, problem-solving, and full stack development, and I'm continuously expanding my skills through academic coursework and personal projects.

Work Experience

As Student I have experience on these Projects:

- Developed a mobile app using **Python** with **Tkinter** for the front-end GUI.
- I Participated in Smart India Hackaton, Collaborated with a team to design and develop a digital solution focused on **water conservation for farmers.**
- Currently Working on Web development.
